Killion Industries, Inc. heads into the new millennium with energy and enthusiasm spurred on by new and expanded facilities and continued investment in state of the art equipment. Although we have been a leading source for innovative quality store fixtures around the globe for more than 21 years, Y2K brings new opportunities as well as continued partnership with top retailers around the globe. Among our current customers, you will find Albertson's, Target, The Great Atlantic and Pacific Tea Company (A&P), Smith's Food & Drug, Costco, Bi-Lo (Ahold Division), Kroger and Safeway. Exporting products around the world: Mexico, Saudi Arabia, Panama, United Kingdom, Poland, Japan and Canada are several of our current destinations.

To manufacture our current product lines, we operate in 200,000 square feet of company owned production space. These modern facilities include our new, twin building 160,000 square foot production facility and corporate office as well as continued operation of our existing 40,000 square foot facility on La Mirada Drive. Complete CNC production of Killion Checkout, Killion Produce and Bakery Fixtures as well as, Killion Refrigeration flows through our state of the art Poinsettia buildings. Our La Mirada location is dedicated to the final production of Killion Produce and Bakery Fixtures as well as Killion Refrigeration. Eleven loading docks between the three buildings ensure on time shipments to

meet the delivery date requirements of our customers.

At Killion, advanced CAD/CAM software coupled with CNC routers by SHODA & KOMO bring us to the forefront of Computer Integrated Manufacturing (CIM). By utilizing CIM, we have the capability to produce custom fixture designs to your specific requirements. Our modular construction gives you the flexibility of modern designs that are easy to install and maintain. We work with you to accommodate the latest technological advances to create highly functional fixtures reflecting detailed attention to operating efficiency, ergonomic considerations and aesthetic goals.

DISPLAY →

**At Killion Refrigeration we build only specialized displays.**

Every display is designed and built to be a floral cooler from the ground up. Great care has been taken to insure that each display will provide you with the best in presentation, preservation and durability. With beautiful designs and the latest in refrigeration technologies you will find that Killion displays are a wonderful choice for your floral department.

- \* Our very attractive floral displays include state of the art designs which allows the customer to see more floral product and less display case. This concept with years of in store testing has proven to greatly increase sales.
- \* For the ultimate in floral care we use only specially designed oversize evaporator coils and low velocity fans. This feature allows us to keep case humidity high and provide excellent and even temperature control. The end result is outstanding floral preservation with greatly reduced product shrink.
- \* Durable heavy duty construction with bumpers helps protect the case from floor buffers and shopping cart damage.
- \* Self-contained or remote refrigeration systems are available.

**FFM-74-42-81**  
Low Profile

Clear front and side windows allow product to be clearly seen and promotes impulse buying.

Casters and inset base allows for flexible applications and protects the mechanical section from shopping cart and floor buffer damage.

Front and optional side bumpers also help protect the entire case from impact damage

**FFM-74-42-81-R**  
Combo display

The best of both worlds is the combination case. The open section for the high volume impulse sales and the closed section for the especially sensitive floral settings and arrangements.

Clear front, sides and top wrap around end windows allow product to be seen clearly and greatly promotes impulse buying.

**FFM-48-42-81**

Combination flexibility in a neat self contained small package

**Special Killion advantages :**

Custom cooler design services. (Why settle for someone else's displays when you can have your own special look.)

Turn key design services include refrigerated and non-refrigerated displays. We can even provide counters, cabinets and workstations.

Training DVD's / CD's to suit your needs including Cooler and display care, product handling and proper merchandising.

Whatever your floral display plans are be sure to contact us for more information on our specialist displays the unique services we provide.

**Turn Key & Layout Design**

Design service is available for your floral departments or if you wish a complete quote on one of your existing designs, just give us a call.

**CFFM 70-35**  
Full Height

Our Standard upright series offers you traditional merchandising with grace, beauty, and performance. Available in many sizes and options this display has proven to be a real winner.

**CFFM 94-40-99**  
3-D

Our new 3 D series can make the impact you are looking for. With merchandising on three sides this merchandiser can take advantage of floor traffic on two side isles and the main aisle at the same time. This display is perfect high traffic large end caps or Island displays.

Extra heavy duty construction makes this cooler almost indestructible. Floor carts, pallet jacks and even fork lifts find this to be one tough display.

**Non-Refrigerated Floral Fixtures**

Traditional and custom dry fixtures are available

From complete turn key designs to simple single displays we have it all.
